

ATTENTION POOL OWNERS!

FREE

“Pool Filtration and Pumping Improvements” **SEMINARS**

The **Stockton Smart Energy Program**, a joint energy-efficiency effort between the City of Stockton and PG&E, is offering two workshops to help Stockton's pool owners (residential or commercial) manage their energy consumption and reduce costs. Participate in this workshop and gain information on pool pumping technology that can reduce a filtration cost by 50%! Hear about the alternatives to a not-so-clean pool, high bills or just resetting the timer.

Learn how to take advantage of these energy management opportunities and available programs and equipment. All pool owners and operators, pool equipment vendors and City & County Maintenance Staff **WELCOME!**

WHERE Stockton

(Directions provided upon registration with confirmation.)
